Hyeonjun Son

Toronto, ON | son7523589@gmail.com | LinkedIn | GitHub | Portfolio Website | +1 437-241-3138

Full-stack developer (React/TypeScript, Node.js) with 2+ years of professional experience across a front-end role in Korea and two developer internships in Toronto, plus two apps shipped end to end, one live on both app stores with 500+ registered users. Hands-on with real-time features (Socket.io), MongoDB/PostgreSQL persistence, automated unit and integration testing.

SKILLS

- **Languages:** JavaScript, TypeScript, Java, SQL, HTML5/CSS
- **Frontend:** React.js, React Native, Next.js, Redux, Zustand, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express, REST APIs (JSON), Socket.io (WebSockets), Spring Boot, MongoDB, PostgreSQL
- **Tools & DevOps:** Git, VS Code, Docker (containerization), CI/CD, AWS S3, Jira, Jest, Vitest, React Testing Library, Playwright, Maestro, Agile/SDLC, AI-assisted development (Claude)

PROJECTS

CaMoim Community App | React Native, Node.js, MongoDB, Socket.io | App Store, Google Play — Jan 2026 – Present

- Owned greenfield, end-to-end full-stack development, including UI/UX design, of a cross-platform community app shipped to the iOS App Store and Google Play, now serving 500+ registered users across Canada.
- Implemented real-time chat with **Socket.io** (1:1 DMs, group rooms, school lounges) and **Expo** push notifications on a **Node.js/Express** + **MongoDB** backend, covered by 153 **Jest** tests, including two-client **Socket.io** integration tests, plus **Maestro** E2E flows in **GitHub Actions** CI.
- Cut home-feed API latency by 60% in benchmarks by tracing a 70 ms cross-region database round trip and removing sequential **MongoDB** queries with a single aggregation pipeline, **$lookup**, and cached lookups.
- Reduced the iOS bundle size by 24.5% by replacing barrel icon imports that shipped unused icon fonts.

Offleash Dog Community App | Next.js, TypeScript, Express, MongoDB, Socket.io | Website — Aug 2025 – Present

- Built the frontend with **Next.js 14 (App Router)** and **TypeScript**, using **Redux Toolkit (RTK Query)** with optimistic updates, **Zustand** for auth, reusable components, and **Tailwind CSS**.
- Implemented location-based matching with **MongoDB** geospatial queries, map-based walk planning, and real-time 1:1 chat with **Socket.io** and per-room authorization.
- Designed an **Express** backend with **MongoDB (Mongoose)** for operational data and **PostgreSQL (Prisma)** for analytics, with **Stripe** subscription billing via idempotent, signature-verified webhooks, 39 **Jest/Supertest** tests, and **Playwright** E2E.

EXPERIENCE

Landseed — **Remote, Canada**
Full Stack Developer (Volunteer) — Oct 2026 – Present

- Develop features for MatchLand, a beta platform matching Canadian landowners with home seekers, as one of 14 developers working across **Next.js/TypeScript** and **Node.js/Express/MongoDB**.
- Work through sprint tickets, pull request reviews, and **GitHub Actions** CI/CD on codebases held above 90% test coverage.

AI Financial — **Toronto, Canada**
Software Developer Intern — Jan 2026 – Apr 2026

- Strengthened platform stability by authoring 40+ automated tests with **React Testing Library (RTL)** and **Vitest** for the **React/TypeScript** frontend and **Mockito/JUnit** unit tests for the **Spring Boot** backend.
- Provided production support, resolving 8 production and development defects through root-cause analysis, troubleshooting, and debugging in a large-scale financial services codebase.
- Co-authored an architecture RFC adopting the **C4 model** after comparing 5 alternatives for architecture reviews.

Project Human City — **Toronto, Canada**
Software Developer Intern — Apr 2025 – Aug 2025

- Optimized **Mongoose** queries and indexes in **Node.js/GraphQL** services, improving API response time by 20% under load while working with design, QA, and security across 5 Agile sprints.
- Delivered **React (Redux)** web features, building reusable UI components and refactoring **Node.js/GraphQL** services.
- Built the **React Native (TypeScript)** mobile app with **GraphQL** and **Zustand**, with bookmarking and an interactive map.

Namdo Kkomak — **Remote, South Korea**
Front-end Web Developer — Jan 2023 – Apr 2024

- Built and maintained the organization's first responsive company website with **React.js**, **TypeScript**, **HTML**, and **CSS**.
- Improved page load time by 30% and drove a 20% increase in monthly visits through on-page SEO.

EDUCATION

Computer Programming and Analysis, Seneca Polytechnic — **Toronto, Canada**
Advanced Diploma — Jan 2024 – Jul 2026

- Relevant coursework: Data Structures, Web Programming, Database Systems, Software Testing, Operating Systems
