SKILLS

Programming Language: JavaScript, React Native, TypeScript, Node.js, React.js, HTML5, C, C++, Spring Boot, Java, Python, PowerShell, SQL, Tailwind CSS

Framework & Tools: MongoDB, MySQL, npm, Husky, lint-staged, Oracle, Post Man, DevOps, WordPress, Docker, Git, Jira, Agile

MS Office Skills: Power Bi, Word, Outlook, Excel, and PowerPoint

EDUCATION

Computer Programming and Analysis, Seneca Polytechnic **Toronto, Canada**
Advanced Diploma, Computer Programming and Analysis 2024 Jan – Present

- Relevant coursework: Object-Oriented Software Development C++, Software Analysis and Design, Web Programming Tools and Frameworks, Database Systems, Software Testing, Programming C, Operating System for Programmers

Joongbu University, Korea **Korea, Seoul**
Bachelor, Electronic and Electrical Engineering 2021 Jan – 2021 Jul

- Relevant coursework: Programming Language C, Principles and Applications of Electrical Engineering

RELEVANT PROJECT

Pet Matching Project | Next.js, TypeScript, Express, MongoDB, Socket.io | [Website](#) 2025 Aug– Present

- Built the frontend with Next.js 14 (App Router) and TypeScript, using Route Groups to separate authenticated/protected routes, with Zustand for state and Tailwind CSS for styling.
 - Implemented real-time 1:1 chat with Socket.io, including socket-level auth middleware and match-membership authorization so only verified participants can join per-room channels; built Tinder-style swipe matching with auto Match creation and GPS-based walk tracking.
- Designed an Express 5 + MongoDB (Mongoose) backend with JWT/bcrypt and security hardening (Helmet, rate-limiting); integrated Cloudinary + AWS S3 image storage and deployed to Vercel + Heroku.

CaMoim Community Mobile App | React Native, Node.js, MongoDB, Socket.io | [App Store](#) 2024 Oct – Present

- Designed, built, and shipped a cross-platform community app to the iOS App Store and Google Play, serving Korean students, immigrants, and working-holiday makers across Canada with school verification, group meetups, and a multi-board feed.
- Implemented real-time chat with Socket.io covering 1:1 DMs, group meetup rooms, and school-wide lounges, including unread badges, Expo push notifications, and role-based features such as student-council leader assignment.
- Architected the Node.js/Express + MongoDB backend with Mongoose, deployed to Railway with automated CI from GitHub, and integrated Cloudinary for image hosting and Resend for transactional email over HTTPS.

EXPERIENCE

AI Financial **Toronto, Canada**
Software Developer Intern 2026 Jan – Present

- Strengthened platform stability by authoring 40+ React Testing Library (RTL) unit tests with Vitest for the React/TypeScript frontend and Mockito/JUnit controller tests for the Spring Boot backend.
- Performed root-cause analysis on production and development defects within a large-scale financial services codebase, delivering targeted code fixes that improved system reliability.
- Researched and documented frontend/backend best practices, contributing to the team's RFC process and participating in architectural review sessions for a React/TypeScript and Spring Boot monorepo.
- Collaborated in an Agile environment using Git/GitHub for version control and code reviews, working closely with senior engineers on a production financial services portal.

Project Human City (PHC) **Toronto, Canada**
Software Developer Intern 2025 Apr – 2025 Aug

- Built and optimized the **MobileApp** with **React Native (TypeScript)**, **GraphQL**, and **Zustand**, implementing bookmarking and interactive map with reliable real-time state updates.
- Delivered **WebApp** features with JavaScript/React (**Redux**) and refactored **Node.js**, **GraphQL** services modularized components and tightened code quality for maintainability.
- Optimized **Mongoose** query patterns and indexes and partnered with design, QA, security in agile sprints, improving API responsiveness under load and delivering features on schedule.

Namdo Kkomak **Korea**
Front-end Developer 2023 Jan – 2024 Apr

- Designed, developed, and maintained a responsive company website using **JavaScript**, **TypeScript**, **HTML**, **CSS**, **Node.js** and **React.js** marking the organization's first step toward digital transformation.
- Collaborated with the creative team to design an interactive company homepage website including video and carousel, improving page load time by 30% and drove 20% increase in monthly site visits.
